

History

- 130 years ago workshop was founded in Tartu, Estonia. During 130 years of development the company produced different type of machinery for agriculture and forestry and has now become the main production base for Forester.
- **Present time, 2007.** The new owner of the plant Yuri Pikk, relying on years of experience and business relationships, develop the enterprise well-known both in the West and in the East of the continent. Yuri Pikk set his goal: **“High-quality, accessible, modern appliances in each forestry farm in Western and Eastern Europe!”**
- The interest in maintaining production capacity concentrated in the city of Tartu, Estonia, is a very important strategic point, which will bring the plant’s output to Europe and the CIS markets. To do this, we have the experience, professionalism, highly qualified mobile team.
